

# CARDIAC MR LEFT VENTRICLE SEGMENTATION CHALLENGE

As part of MICCAI 2009's 3D Segmentation in the Clinic: A Grand Challenge, Sunnybrook Health Science Centre is presenting the Cardiac MR Left Ventricle Segmentation Challenge. Imaging researchers are welcome to test their automatic segmentation algorithm against other cutting edge algorithms and win fame and glory!

- Data sets containing a variety of pathologies and ventricular shapes will be provided.
- One data set will be provided with contours prior to the workshop for training. A second set will be provided without contours for testing and paper submission. A final set will be provided for on-line testing during the workshop.
- The comparison code used to judge the final results will be provided on-line.
- Visit [http://smial.sri.utoronto.ca/LV\\_Challenge](http://smial.sri.utoronto.ca/LV_Challenge) for more information.
- Good luck!
